

CyberMed T10C

Medically Certified Windows Tablet

Portable, Powerful, and Certified for Medical Use

Built with industrial grade components with a Mean Time Between Failure (MTBF) of 50,000 hours to stand up to the 24/7 demands of healthcare use.

Medical Grade Certified

Windows OS

The CyberMed T10C is compatible with Windows 7, 10, or Linux and is equipped with a lightning fast Intel Quad Core processor giving it the speed and power to run complex software.

Antimicrobial

The unique design of the CyberMed T10C includes an antimicrobial compound injected into the plastic molding to help reduce the spread of harmful bacteria.

IEC/UL 60601-1 Certified

This tablet has been engineered to meet the stringent 60601-1 electrical and radiation safety standards required for near patient use.

IP65 Rated

The sealed front bezel is IP65 certified, so it will stand up to chemical disinfectants and makes it easy for medical professionals to clean.

The Perfect Embedded Device

Unlike commercial grade tablets, the CyberMed T10C has multiple full sized ports that make it easier for medical device manufacturers to pair with their devices. Coupled with a powerful processor, windows capability, and UL/IEC 60601-1 certification, this is an ideal tablet for medical OEMs.

Imprivata SSO Certified

The CyberMed T10C can be customized with internal RFID or biometric readers that are natively Imprivata certified. There is no longer a need to attach external dongles to your device, reducing clutter and freeing up ports.

Built with Customization & Compatibility in Mind

- Windows 7, 10, and Linux Compatible
